

## Power Animal Retrieval

Do you feel depressed? Weak? Are you prone to getting illnesses? According to shamans, these may be symptoms of having lost your power animal or guardian spirit.

Shamans believe that the power from having a guardian spirit makes one resistant to illness. Other beliefs are that power animals also increase one's physical energy, self-confidence and mental alertness. Some people believe that the enhanced power even makes it more difficult to lie!

A guardian spirit or power animal brings power from an entire genus or species. Therefore, it provides a "power-filled" body enabling the person to resist outside intrusions that may be harmful.

A power animal provides a source of power and guidance that is always beneficial to the person. The guardian spirit comes to help the person and provides a protective, energetic force field around him/her. For more information, consider reading *The Way of the Shaman* by Michael Harner.

If you have been feeling lost, listless or have been experiencing ill health, then consider making an appointment for a power animal retrieval.
